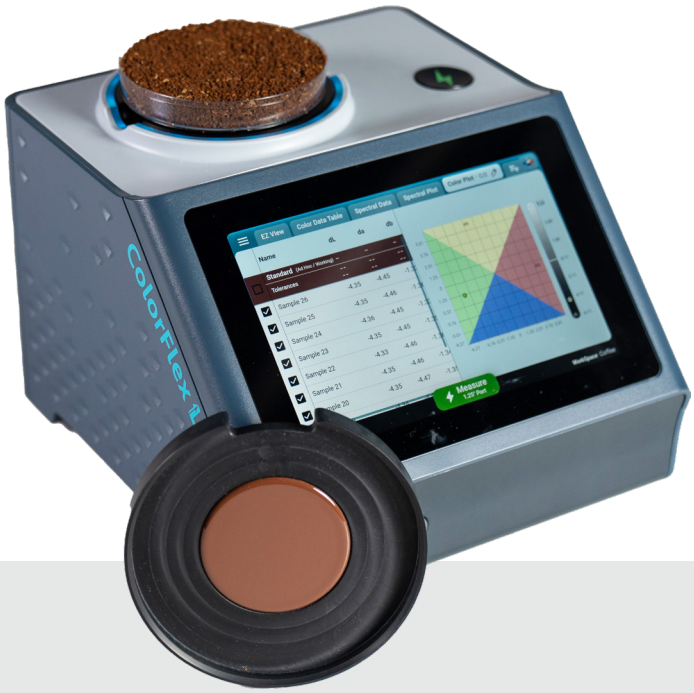
The world's true measure of color
HunterLab



ColorFlex® L2 Coffee

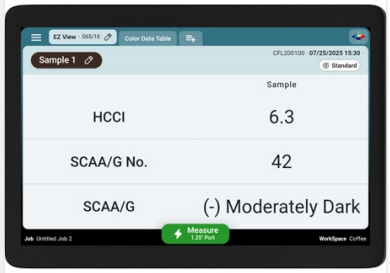
Level UP your Color Confidence with the new ColorFlex L2 Coffee Spectrophotometer.

As simple as you want, as powerful as you need.

Elevate your color accuracy and user experience like never before. Compact and ergonomic build requires minimal space while offering enhanced durability and reliability. Designed to streamline and expedite your quality control processes, ColorFlex L2 Coffee Spectrophotometer is expertly crafted to measure the color of ground and brewed coffee.

Explore the Next-Gen

ColorFlex®...L2 Coffee



#1 Color Measurement Solution for Ground and Brewed Coffee

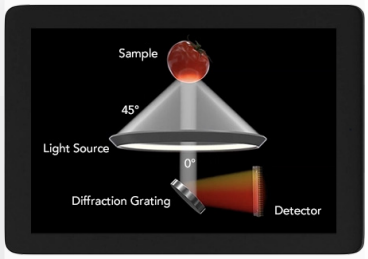
All the Coffee Scales and Indices You Need: The ColorFlex L2 Coffee is specifically designed to measure the color of ground and brewed coffee in a sample cup. Includes HCCI HunterLab Coffee Color Index values, SCAA Number, SCAA Roast Classification and L*a*b*.

HunterLab Reference Standard - Coffee

Immediate Measurement: Easy coffee color measurement with tailor-made coffee standard with factory-set color values, enhancing the accuracy of your color data.

45°a:0° Annular Illuminated Optical Geometry

Superior Consistency and Color Accuracy: Enhancing the efficiency of Quality Control workflows and delivery of superior quality products repeatedly.



Compact with Sealed Spillproof Case

Space-Saving and Easy Maintenance: Occupies minimal space and is designed to withstand the demands of busy lab environments.

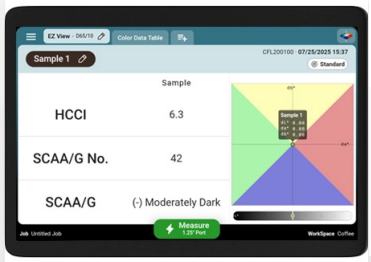
COFFEE

Powerful Standalone Functionality

No Computer Required: With huge onboard processing and storage capacity, ColorFlex L2 Coffee can function as an independent color workstation. Connect monitor, keyboard, and mouse if desired.

Modern Smart User Interface with Touchscreen Color Display

Durable and Efficient: Facilitates accurate color measurement in seconds, with a robust industrial glass design suitable for harsh environments.

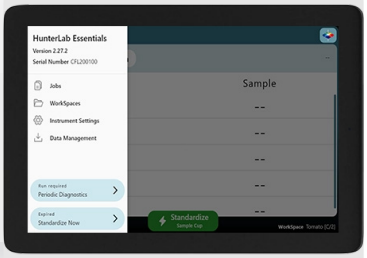


New & Improved Color Software

Essentials 2.0: Take precise and reliable color measurement in seconds with next-gen user-friendliness and seamlessly analyze multiple tristimulus and spectral data sets. It's that powerful.

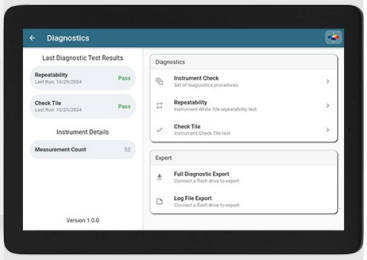
Self-Guided and Intuitive Out-of-Box Startup

Time-Saving and User-Friendly: Ready to use straight out of the box with an integrated wizard for quick training, reducing operator time and easing concerns related to staff training and turnover.



Built-in Advanced Diagnostics

On-Board Diagnostic Health Check: Ensures the HunterLab ColorFlex L2 Coffee is always operating at peak performance, continuing to build on the legendary history of reliability of the ColorFlex family of instruments.



COFFEE

Advanced Data Export and Communication

Full Suite of Data Communication Options: Features Ethernet and USB port for easy data export and printing. HDMI and additional USB port for mouse, keyboard and other accessories.

Connectivity with LIMS and SPC systems

Simplifies QC Workflows: Aids in trend analysis and workflow simplification across manufacturing sites.

CONTACT US

We've worked with thousands of companies, but you'll feel like our one and only. If color accuracy is crucial to your business, you've come to the right place—with the right people. Let's get in touch. Ask a question, request a quote or just say hello!
