

ColorFlex® EZ

for...

SEASONINGS

HunterLab

Designed for the color measurement of seasonings, ColorFlex® EZ has a large, easy-to-read display and a sealed keypad. Occupying minimal bench space, the system is very easy to use. Simply pour the seasoning into the sample cup and press measure. The onboard software immediately displays your color data including CIE L*a*b* and CIE LCh, Hunter L,a,b, and more. These quantitative values allow seasoning manufacturers to accurately evaluate the quality of their seasoning products.

The ColorFlex® EZ is compatible with HunterLab's EasyMatch® QC software and can be connected to a printer if hard copy data is desired.

Designed for the color measurement and classification of seasonings

45°/0° measurement geometry measures color the way the eye sees color

Onboard software includes common food industry scales and indices

Requires very little bench space

Can be connected to a printer or a PC

The Best Solution for Color Measurement of Seasonings

45°/0° measurement geometry measures color the way the eye sees color

ColorFlex® EZ uses circumferential 45°/0° geometry and a 1" sample viewing area for the most accurate and consistent measurement of seasonings. This geometry replicates the human visual response, measuring color the way the eye sees color.

Onboard software includes everything needed for seasoning color measurements

The onboard ColorFlex® EZ software includes all common color scales used in the food industry including CIE L*a*b* and CIE LCh and more. Store over 250 product set-ups and communicate up to 2000 sample measurements including standards values and pass/fail tolerances with 3 USB 2.0 ports.

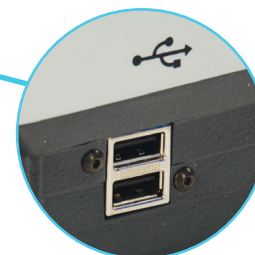

Small and rugged — requires very little bench space

The rugged design includes a sealed optical design for the industrial environment, and measures only 16 cm (6.3 in.) X 13 cm (5.1 in.) X 36 cm (14.2 in.), requiring minimal bench space.

Can be connected to a printer or a PC

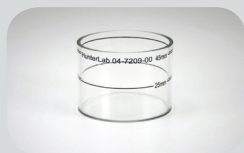

Connecting to a USB printer allows hard copies of measurement data to be printed, or connect to HunterLab EasyMatch® QC PC software to collect, display and analyze your color data.
